WHY CHOOSE XTREME?

This impressive 30-seater attraction commands the attention of event-goers as it majestically traverses the sky in an array of dynamic motions, offering passengers sensations unequalled by other flat rides.

Xtreme is a truly incredible thrill ride. The unique drive motion creates an oval arc in both directions. The gondolas at the end of the cross arm rotate freely using centrifugal force, which generates an exciting whipping motion. All of these movements combined with the freedom of manual controls add up to a ride experience that is incredibly exciting.

CORONAVIRUS & SOCIAL DISTANCING

As an outdoor attraction, we are in an inherently good position to avoid the passing of Coronavirus from person to person. However, we also implement other practices to keep infection risk to an absolute minimum, such as: Social distancing, face coverings, hand sanitiser stations, frequent cleaning of touch points, disinfection of the passenger restraints, contactless payments, NHS track and trace check-in and on-going risk assessments.
